FSC / PEFC Certified

Foreword

Cranwood Industries is one of Ireland's foremost suppliers of timber and timber-based products.

Operating from two purpose built timber mills in County Down we pride ourselves on our ability to provide you with whatever design you require to make the most of any project, big or small.

We can provide all your timber needs for the construction of your new home or the improvement of your existing house, right through to the final touches for your garden landscaping project.

Our Warrenpoint Mill carries an extensive range of hardwoods, softwoods and sheeting materials. Experienced staff can mould these timbers to your preferred design, including bespoke designs, to achieve your internal décor aspirations.

Our delivery service encompasses both NI and ROI and our highly trained sales staff are available to discuss all aspects of your particular project.

Our comprehensive range encompasses everything you require to make the most of your House , Home or Garden,

We have made this an informative booklet so that you can get a taste of the options available to you when it comes to timber and timber-based products. Please do not hesitate to contact us if you want to discuss any of the options you see here or require further information.

Timber Certification

As part of our environmental policy both mills hold Chain of Custody Timber certifications for FSC, PEFC & MTCS.

Cranwood Industries Newry

Cranwood Industries Warrenpoint

Any profile available

Cranwood have years of technical expertise with state of the art machinery and modern technology with imaginative designs to provide the most comprehensive range of mouldings in the marketplace today. Bespoke one off moulds can also be produced to customer requirements.

The only limit is
your imagination!

Special Machined Timbers

Walnut

American Walnut is a tough, hard timber. The hardwood is a rich dark brown with distinct grey sapwood. It is shown here in a commercial property along with chrome door fittings.

Poplar Pre-Finished

Skirting, architrave and plinths for a Georgian look, all in pre-finished poplar. Poplar is a medium hardwood ideally used for a paint grade finish as shown here.

(see Timber Pre-Finishing for more information on prefinishes)

Redwood Beaded Sheetting

Redwood skirting with beaded panelling all machined by Cranwood to match the original profiles in the newly re-furbished Crescent Arts Centre in Belfast.

Stair Components

Cranwood stock all major stair components. We have a huge selection of handrails, base rails and spindles.

Traditional Handrail

A dark hardwood handrail with painted hardwood spindles giving this staircase a traditional look with a modern twist.

Contemporary Handrail

Shown here is a round White Oak handrail to complement the straight cut glass.

Laminating

Laminating is used to produce items that are wider than standard machining capabilities i.e. 275mm and wider, or for species such as walnut or cherry that are traditionally not available in sections wider than 150mm.

This service is available for all products and is particularly useful when manufacturing stair components.

Manufactured Defect Free Mouldings (MDF)

(Available in primed or hardwood veneered)

MDF has become a very popular choice for internal joinery finishes, because it won't twist, shrink or split after fixing and is knot-free giving a smooth attractive finish.

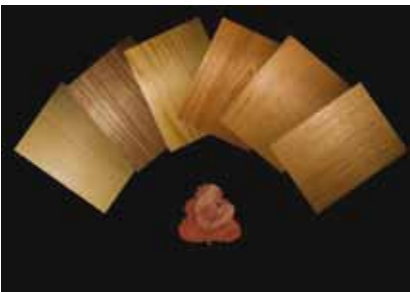

All MDF is manufactured from a moisture resistant board making it very stable in a new build environment.

A bevelled oak veneered MDF has been used here to give a contemporary look to this modern home. It can be supplied pre-finished or unfinished.

Cranwood is the sole agent for PrimerMould MDF products in Ireland.

Sheet Materials

Cranwood offers an extensive choice of MDF sheet materials to complement our range of natural timber products.

We can offer standard, moisture resistant and veneered MDF as well as a full range of plywoods.

External Sheeting & Cladding

Sheeting and Timber Cladding is increasingly being used externally on buildings to provide a warm classy look which is also highly durable.

Larch

Siberian Larch was used for the external cladding in Tollymore National Outdoor Centre Co Down (shown here). Not only is it aesthetically pleasing but it offers excellent durability and is considered environmentally friendly.

Cedar

Western Red Cedar, shown here, was used for the external cladding in St Marys Hospital Co Dublin and is probably the most commonly used of all timber for external cladding.

It can be left untreated to turn an attractive silver grey or can be supplied pre-finished.

Iroko

When used as an external cladding Iroko gives a building a warm modern and natural look. Pre-finishing before fitting helps seal in that natural colour.

Timber Pre-Finishing

The benefits of Pre-Finishing Timber include a superior finish, no waiting for decorators on site, a finished product prior to installation and reduced decorating costs.

This service is ideal for all interior joinery finishes and is being used more frequently as customers recognise the benefits.

All exterior timber applications can also be pre-finished.

Lacquering

Available in the following finishes:
Matt, Gloss, Mid Sheen, Sheen and Staining.

Priming / Painting

Available in the following finishes:
Undercoating and spray finish.

Popular Pre-Finishes include:

- White Gloss
- Off White, which is particularly suitable for heritage work but can also be used in residential or commercial premises aspiring to that heritage look.

Most popular Hardwood species

Ash

Cherry

American Black Walnut

Mahogany

American White Oak

Many other species
available in stock.
Please contact us to
discuss your requirements.

Structural Timber

Our structural timber yard is located on a purpose built site in Newry. As a major importer of timber we pride ourselves on our vast range of stock and our state of the art machining and treatment facilities.

These two factors mean that we can provide you with unrivalled levels of customer service and expertise, and a fast turn-around service.

We offer a complete range of services including regularising, grading and treatment options. We can also produce a wide range of specially cut tapered pieces and fillet cuts.

Both of our Timber Treatment plants use preservatives supplied by Arch Timber Protection. These have been specifically formulated to make use of biocides with a low environmental impact.

Our recently installed high pressure (Tanalith E) treatment plant boasts full computer controlled treatment cycles.

These match the treatment duration to the final end use, giving you peace of mind about the durability of your investment. We can provide you with treatment certificates if required.

Our low pressure (vac/vac) system uses Vacsol Aqua 6112 and provides an alternative treatment for those timbers which are not in ground contact.

Timber Decking

Time to enjoy your garden a little bit more...

Timber decking can expand the home and improve your outdoor living environment. Custom built for relaxation, timber decks provide an area for relaxation.

Decking can be built in almost any shape or size, which means you can design it to suit your taste and budget.

Cranwood can provide a full range of decking and components in both hardwood and softwood timber.

Fencing

Whether you are enclosing your whole garden or segregating a small area for particular reasons our range of fencing products and accessories are ideal.

We also stock the full range of round and square decorative posts, D rail, S rail, bevelled and round top fencing boards.

All our Fencing Products are treated with Tanalith E to ensure your fence remains attractive and serviceable for many years to come.

Whatever your requirement on Structural Timber, Fencing or Decking we are sure we can meet your requirements.
